WELCOME

For over 35 years, Zammit Metal Roofing has been a foundation of the Sydney's metal roofing industry. Our unwavering dedication to quality manufacturing and exceptional service has made us a trusted name among roofers, architects, and tradespeople throughout New South Wales.

Specializing in the manufacturing and supply of metal roofing products, we pride ourselves on being at the forefront of innovation. Continuously improving and adapting to meet the evolving needs of the market.

Renowned for our premium materials, and extensive industry expertise, Zammit Metal Roofing stands as a preferred choice for metal roofing manufacturers in Sydney. Whether it's for residential or commercial projects, our commitment to customer satisfaction remains unwavering.

Conveniently located in Glendenning, our reach extends far beyond our physical location. With a solid reputation as the leading metal roofing manufacturer in Sydney and across New South Wales, we are the go to supplier and manufacturer of all your metal roofing needs.

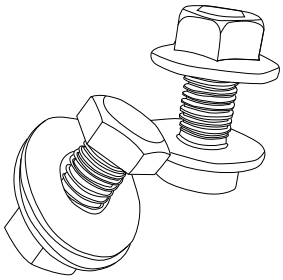
Purlin Bolts



Purlin Bolts – Suitable for both C and Z Purlins

Roof Safety Mesh

Roof safety mesh provides vital fall protection for those working at heights across a range of, domestic, commercial, and industrial applications using steel or timber structures.

Roof safety mesh is an ideal support for foil underlays in exposed roof spaces and synthetic underlays.

- Must be used with enclosed building only.
- Not recommended for use with exposed roofs such as awnings as it will compromise the durability of the roof safety mesh.
- Not recommended for high moisture loading buildings.
- Should not be exposed to weather elements, such as sun, dust, rain.
- Heavy roofing machinery should not be placed on top of roof safety mesh.

ARCHITECTURAL PRODUCTS

Discover a diverse selection of modern architectural solutions at Zammit Metal Roofing. From our renowned Rapid Seam and Rapid Clad systems to sleek aluminum battens, cladding, and decking options, we offer a comprehensive range of contemporary products to enhance your project's aesthetic appeal and functionality.

square rib profile exclusive to Zammit

RAPID SEAM

Rapid Seam cladding captivates with its distinctive visual appeal, characterised by wide flat pans and an exclusive square rib design. Its clean and striking aesthetics are complemented by a seamless style, making it an exceptionally versatile cladding solution for contemporary architectural designs.

With our Rapid Seam's exclusive square ribbed profile and our Rapid Clad's sleek flat tray design, our engineered cladding offers modern crisp lines that truly stand out. Whether installed horizontally or vertically, our cladding effortlessly enhances any architectural style, infusing your project with a touch of elegance, and making a lasting impression.

Panel Length	Custom lengths to order
Standard Width	From 265mm to 465mm *special order custom widths
Material Thickness	0.55mm BMT G300 grade steel
Panel Depth (Rib)	35mm

Available in all Colorbond and Colorbond Matt colours.
* custom colours available on request.

Fast and efficient simple installation
using concealed fixing

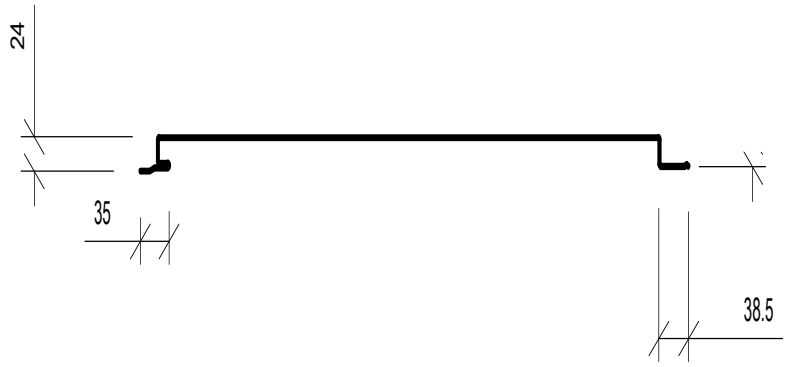
NATA Rapid Seam has been independently Testing by the Cyclone Testing Station which is a NATA accredited Laboratory

(02) 9675 5622 | sales@zammitroofing.com.au

RAPID CLAD

Whether used in long lengths running vertically or horizontally on a structure, or in shorter lengths to create a 'block-like' effect, Rapid Clad is designed to make a bold and stylish statement. Featuring raised panels and recessed 'express' joints, this profile exudes a sleek and contemporary character, enhanced by the shadowed channels that add a pleasing level of detail.

Zammit R-Series wall and roof cladding captures the essence of contemporary design, bringing architectural inspiration to your project



Panel Length	Custom lengths to order
Standard Width	From 285mm to 485mm *special order custom widths
Material Thickness	0.55mm BMT G300 grade steel

Aluminium Battens, designed to elevate any architecturally inspired structure with a contemporary touch, providing a floating or free-standing aesthetic. Crafted to perfection, our aluminium battens serve a multitude of purposes, including –

- Enhancing privacy screens for balconies and pergolas
- Reinventing garage doors with a modern flair
- Transforming fences into stylish barriers
- Adding distinctive design elements to garden landscapes
- Available in a range of powder coated and wood look finishes

Based on a 2 part system. The backing is fixed to the substrate, then the batten is simply clipped on to conceal the fixings. We have over 20 different shapes and sizes that can be used with our batten extenders, spacers and backing systems.

Elevate your home with our aluminum cladding, designed to infuse modern architectural flair while demanding minimal upkeep. Ideal for accentuating feature walls, eaves, or ceilings, its versatility extends seamlessly to both residential and commercial applications.

Available in a variety of powder coated and wood look finishes to elevate your space with style and durability.

A selection of board styles that interlock together. Trims and finishing pieces provide a clean, minimal finish.

Clip in profiles can be added to our dimensional board for a striking textured effect.

Designed for lasting durability and elegance, our aluminum decking offers an ideal solution for indoor or outdoor flooring, ideal for both residential and commercial applications. Engineered from aluminum, these decks are well suited for BAL rated zones, featuring a textured surface for added traction and aesthetic appeal.

Cleverly designed decking boards that interlock and clip together. Great for balconies, roof terraces, walkways, poolsides and gardens.

SKYLIGHTS

Pitched Solar-Powered Skylights

VSE

Electronically Operated

VSS

Solar-Powered

- Electrician not required to install.
- White painted interior timber frame and sash.
- Smooth profile sits lower in the roof, does not obstruct the roofline.
- Available in 10 sizes.
- Rain sensor automatically closes the skylight when rain is detected.
- High Performance double glazing, with NEAT™ outer coating: reduces cleaning frequency.
- Includes removable insect screen.
- Complete with flashing for corrugated iron or tile roofs.

VS

Manually Operated

FS

Fixed (non-opening)

- Electrician not required to install.
- White painted interior timber frame and sash.
- Smooth profile sits lower in the roof, does not obstruct the roofline.
- Available in 10 sizes.
- Rain sensor automatically closes the skylight when rain is detected.
- High Performance double glazing, with NEAT™ outer coating: reduces cleaning frequency.
- Includes removable insect screen.
- Complete with flashing for corrugated iron or tile roofs.

Sun Tunnel

TWF

Flexible

TWR

Rigid

- Choice of highly reflective rigid or flexible tunnel (350mm diameter, lengths vary – details on page 15).
- 4mm toughened external glass.
- Dual-layered ceiling diffuser – spreads light over an area of up to 9m2.
- Interior diffuser with 'Edge Glow', a clear ring on the diffuser's edge.
- Outer polyurethane cappings with integrated flashings for tiled/ corrugated iron roofs.
- 'Stay clean' coating on glass exterior reduces cleaning frequency.
- Easier and quicker to install with VELUX Flexi Loc system. (TWR).

NB: For best performance VELUX recommends TWR for shafts over 1m.

* Sun Tunnels are not suitable for roof pitchesbelow 15°.

^ Bushfire testing applicable to roof pitches 18°-60°. TWR only.

(02) 9675 5622 | sales@zammitroofing.com.au

Flat Roofs

VCS

Solar-Powered

- Electrician not required to install.
- Maintenance Free – White PVC interior frame for a tough, hard wearing interior finish.
- Available in 8 sizes.
- Rain sensor automatically closes the skylight when rain is detected.
- High Performance double glazing, with NEAT™ outer coating: reduces cleaning frequency.
- Includes removable insect screen.
- Requires custom-made flashing (not supplied by VELUX).

VCM

Manually Operated

- Maintenance free – White PVC interior frame for a tough interior finish.
- Outer aluminium cappings (grey).
- Available in 7 sizes.
- High Performance double glazing
- as standard; with NEAT™ outer coating: reduces cleaning frequency.
- Includes removable insect screen.
- Requires custom-made flashing (not supplied by VELUX).

FCM

Fixed (non-opening)

- Unlike acrylic or polycarbonate – laminated glass will not fade nor discolour over time.
- The smooth exterior gives a lower
- profile on the roof.
- High Performance double glazing as standard; with NEAT™ outer coating: reduces cleaning frequency.
- Approx 99% UV Block.
- Available in 12 sizes.
- •Requires custom-made flashing (not supplied by VELUX).
- Versatile positioning††: most sizes can be used in portrait, landscape or even "diamond shape" orientation.

Attic Conversations

GGL

Centre pivot roof window

- A short pull on the top control bar allows filtered background ventilation even while the window remains shut.
- A second pull on the control bar allows the window to rotate for maximum ventilation – and up to 180° for cleaning the outer pane from inside the room.
- Quality white painted pine sash & frame.
- Complete with flashing for corrugated iron or tile roofs.
- Available in 5 sizes.
- Laminated double glazing as standard

GPL

Dual action roof window

- Opens in two ways: the bottom handle allows for top-hung opening; a short pull on the top control bar allows filtered background ventilation even while the window remains shut.
- A second pull on the control bar allows the window to rotate for maximum ventilation – and up to 180° for cleaning the outer pane from inside the room.
- Quality white painted pine sash & frame.
- Complete with flashing for corrugated iron or tile roofs.
- Available in 5 sizes.
- Laminated double glazing as standard.
- Insect screen available as extra.

Accessories

EDW Flashing

For metal or tile roofing

- Flashing for single skylight or roof window.
- Designed for roof pitches from 15° to 90°.
- For roofs below 15° create pitch-up and use custom made flashing (not supplied by VELUX).

(02) 9675 5622 | sales@zammitroofing.com.au

ZMR PERGOLA RANGE

If you're looking to add a touch of luxury and elegance to your outdoor space, a Zammit pergola is the perfect addition. Our pergolas are made with engineered aluminium, fully customisable, available in a range of colours and come in three beautiful designs – louvered roof, insulated roof, and rafted roof. A Zammit pergola will transform any outdoor space into an oasis.

Discover our collection of Pergolas & Awnings in the ranges.

The Belvedere – Louvered Roof Pergola

If you're looking for a way to improve your outdoor living space, a louvered roof pergola is the perfect solution! Our Belvedere pergola is not only stylish and sophisticated, but it's also perfect for entertaining guests all year long, no matter what the weather is like. As our pergolas are completely customisable, it is suited to either small or large gardens, next to pools, and even on decks or patios. Plus, you have complete control over the amount of sun or shade that is allowed into the space. So, whether you want to enjoy a sunny day outdoors or escape the heat of the midday sun, a louvered roof pergola has you covered!

The Belvedere is

- Fully customisable
- Available is powder coated steel or engineered aluminium
- Available in custom colours to suit any design
- Full remote control louvered roof system

Zammit Metal Roofing Fascia Gutter offers a modern, clean look along with the strength advantages of a stiffened back for excellent performance. Our gutters are machined pressed to guarantee a straight length and a large capacity for water drainage. The high front profile conceals the edge of the roofline for a neat, finished look.

Our fascia gutter range is available in a variety of COLORBOND® steel colours and finishes, making them perfect for carports, awnings, and compatible with most of our pergola range.

- COLORBOND® .055 pressed
- 8 meter max length
- Only available unslotted

Accessories sold separately.

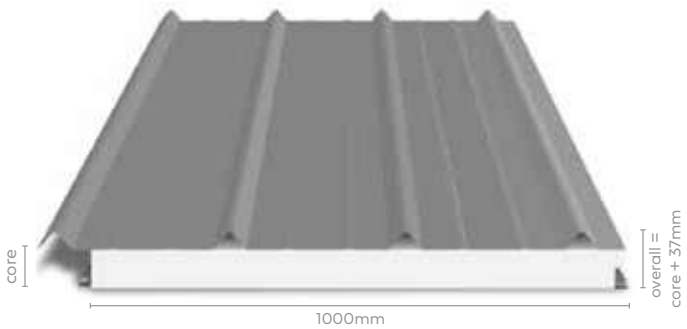
Spacemaker

Only 1 degree pitch & up to 11.4m trafficable free span



Key Features & Benefits

- Minimum roof pitch only **1°** - lowest pitch available
- Our longest trafficable **unsupported span** of up to **11.4m** means less unsightly support beams
- **Maximum panel length of 15.0m**
- Lightweight and easy to install
- Wiring services run through core duct
- Custom 37mm high trapezoidal profile
- Fire retardant EPS insulated core dramatically reduces radiant heat transfer, mould and condensation
- **Fire flashings** available to suit up to BAL 40
- **LED downlights** and **ceiling fan mounting plates** available
- Solar panel installation engineering
- **Skylight strips** now available in kits
- Side eave overhang up to 450mm based on full width panel. **Cantilever** distance up to **2.85m**
- Ceiling surface available in **Smooth, Micraline, Luxline** or **Embossed** in colours as shown.

Sheet mass			
10mm	1700 gsm	16mm	2700 gsm

Available Sheet Structure

Ampelite recommend using standard gauge 10 mm twinwall sheeting for most residential and smaller commercial applications. The 16 mm gauge is often specified for larger projects.

A range of other gauges to suit almost any project are available subject to order quantities. Please consult your nearest Zammit Roofing office for current stock lead time.

Level 1

CORRUGATED - Colours
Clear, Opal, Grey, Light Bronze, Smooth Cream, Dark Tint.

GRECA - Colours
Clear, Opal, Grey, Light Bronze, Smooth Cream, Dark Tint.

5 RIB - Colours
Clear, Opal, Grey, Light Bronze, Dark Tint.

See colour chart, shade factors, light and heat transmission.
Sheet cover 760mm.
See table of sheet lengths.

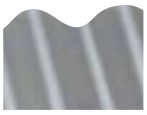
Level One – SolaSafe Range

Key: 0 = Full Light 10 = Full Shade

The most widely used Solasafe polycarbonate sheet. Six colours with varying light and heat transmission.

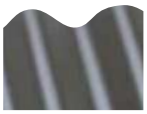
CLEAR
Shade Factor 1
Light Transmission 91%
Heat Transmission 85.2%

LT. BRONZE
Shade Factor 3
Light Transmission 36%
Heat Transmission 60.6%



GREY
Shade Factor 5
Light Transmission 26%
Heat Transmission 50%

OPAL
Shade Factor 7
Light Transmission 55%
Heat Transmission 40.2%



DARK TINT
Shade Factor 7
Light Transmission 17%
Heat Transmission 38.9%

SMOOTH CREAM
Shade Factor 7
Light Transmission 44%
Heat Transmission 35.2%

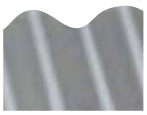
Temperatures in direct sunlight are greater than the temperatures given in weather reports. The shade factors shown provide an indication of the heat absorbed or reflected by the Solasafe sheet.

Level Two – SolaFrost Range

Key: 0 = Full Light 10 = Full Shade

The SolaFrost range. Low transmitted heat, softer light, more comfort.

CLEAR
Shade Factor 2
Light Transmission 91%
Heat Transmission 85.2%



GREY
Shade Factor 7
Light Transmission 91%
Heat Transmission 85.2%

Ampelite SolaFrost will significantly reduce the amount of direct sunlight and glare when compared with standard polycarbonate sheeting. This in turn greatly enhances comfort of your outdoor area.

Unlike Level 1 Standard polycarbonate transparent sheeting, Zammit Roofing SolaFrost is a translucent (diffused) polycarbonate product.

This greatly enhances outdoor comfort.

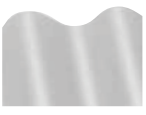
- Translucency = Heat and glare reductions.
- Transparency = Some heat and glare.
- Matt texture helps eliminate expansion noise unlike standard polycarbonate sheeting.

Level Three – HR1 Range

Key: 0 = Full Light 10 = Full Shade

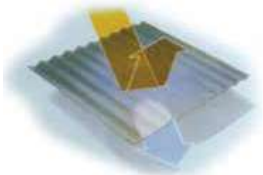
Solasafe HR1 Heat reducing sheeting. Especially suitable in hot climates.

PEARL ICE
Shade Factor 6
Light Transmission 87%
Heat Transmission 85.2%



SILVER MIST
Shade Factor 7
Light Transmission 27%
Heat Transmission 49.87%

Light transmission of all colours and grades is determined in accordance with AS/NZS 4257.4. The colour representations of Solasafe polycarbonate above are as accurate as the nature of the material and commercial photographic and printing processes allow. It is probable that colour tints may vary between those shown in this brochure.



Level Three Solasafe HR1 has a metallic finish that reflects the heat and gives soft diffused light.
